Experience

Frontend Developer - Typescript | React | Tailwind | Vitest | DDD | MFE Microfrontends

NTT DATA Europe & Latam | Spain | 07/2025 - Present | remote

- Develop and maintain frontend features within the global banking sector for a high-traffic developer portal used by over 30,000 developers, leveraging React, TypeScript, React Router, and React Context to ensure high availability and performance.
- Migrated and scaled the core architecture from a monolithic Shell project into a Microfrontend Module Federation ecosystem, decoupling core capabilities into dedicated UI micro-apps and specialized domain SDKs orchestrated via Vite.
- Apply Domain-Driven Design (DDD) and Clean Architecture principles, ensuring a strict separation of concerns by encapsulating API logic and business rules within domain SDKs, away from the presentation layer.
- Implement and build scalable, cohesive user interfaces across the portal utilizing Tailwind CSS, translating high-fidelity Figma designs into clean code alongside a specialized UI component library.
- Maintain high code quality and security standards by adhering to industry best practices, using ESLint, Prettier, and Commitlint, running strict Type-checking, and resolving code health and vulnerability insights via SonarQube and Fortify.
- Integrate and work within automated deployment environments, utilizing GitHub Workflows and CI/CD pipelines while ensuring code reliability and coverage through unit testing with Vitest.

AI Projects Frontend Developer (Contract) - Javascript | Next.js | React | Tailwind | Jest | Supabase

Firebus Tech Labs | Spain | 09/2024 - Present | remote

- Developing a product in a Startup environment, aimed at providing AI-powered solutions for B2B and B2C projects.

Frontend Developer - Javascript | React | Sass | Rest Api | PHP | Docker

Grupo Juinsa | Spain | 07/2022 - 07/2024 | remote

- Developed a real-time dashboard using React to monitor deployments in Staging and Production environments, integrating the Bitbucket API to fetch and display status.
- Integrated Consent Management Service to track and manage cookies in the project.
- Implemented brand new themes in two of the group's stores, reflecting the company's new visual identity.

Frontend Developer - Javascript | GSAP

Vancondieresis - Modern Talking | Spain | 09/2021 - 06/2022 | on-site

- Developed custom websites from scratch for end clients, implementing designs provided in Figma by the Design Team.
- Designed wireframes based on the client needs, proposing functional and modern alternatives to deliver to the UI team.

Frontend Developer - Javascript

Flavia Arias | Argentina | 07/2020 - 08/2021 | remote

- Developed corporate websites for end clients using vanilla Javascript.

Skills / stack

TypeScript | React | Next.js | JavaScript | Microfrontend Module Federation | Domain-Driven Design (DDD) | Clean Architecture | Vite | Rest API | Tailwind | Figma | Motion | Vitest | Type-checking | Git | Docker | GitHub Workflows | CI/CD

Coursework

CS50 HarvardX
Computer Science
07/2024 - 01/2025

Codecademy
Frontend Engineer
06/24 - 12/2024

Digital House
Full Stack Web Dev
06/2019 - 12/2019

Languages

Spanish - Native
English - C2 (Proficient)

Other details

EU Citizen
Work permit NIE

About me

I'm a frontend developer with +5 years of experience, plus a couple years freelancing. I've done some work in backend, but I always go for frontend. I believe good UI and UX are game-changers. These days, I'm all about building fast, responsive, and smooth interfaces

Education

Universidad Tecnológica Nacional
Electromechanical Engineering - 3rd year, 2008 - 2012
